WORK EXPERIENCE

Freelance

Sept. 2025 – Present

Frontend Engineer

Remote

YJTours — yg-tours.vercel.app

- Built a full-stack tourism booking platform using Next.js 16 (App Router), React 19, TypeScript, and Supabase; architected Server/Client Component separation with lazy-loaded sections and LCP optimisations.
- Engineered a custom Three.js WebGL particle system and GSAP scroll-driven animations for a luxury tourism platform creating a cinematic, immersive experience with smooth section transitions.
- Developed a protected admin dashboard with tour CRUD, booking management, and analytics using Supabase Auth, Zustand for global state, and react-hook-form + Zod for validated forms.

Zinad IT

July 2023 – Feb 2024

Junior Software Engineer

Remote.

- Built and maintained the frontend of a cybersecurity report generation platform using React, Reducing report generation time by 40%.
- Improved report accuracy by 20%: inconsistent manual entry was producing scoring errors across reports. Enforced structured input validation and standardised data templates eliminating the most common errors.

Link Development

June 2023 – Jul 2023

Frontend Intern

Cairo, Egypt

Projects

RoomFolio

- Built a real-time interactive 3D portfolio using React Three Fiber, Three.js, and TypeScript replacing a traditional scrolling layout with a fully explorable isometric room where visitors click real objects to navigate content.
- Managed the end-to-end development of the project, utilizing TypeScript and React hooks for optimized data handling and reusability, reducing possible bugs by 15% and accelerating the development.
- Created a custom GLSL shader (Perlin-noise vertex displacement and fragment masking) to render animated coffee steam.
- Optimised asset delivery with DRACO-compressed GLTF, baked lighting for a PBR-free rendering pipeline, and CSS3D-projected React components pinned to 3D mesh positions for in-scene project slideshows.

Cogniverse cogniverse-rho.vercel.app

- Designed the application interface in Figma and implemented it using Next.js and Tailwind CSS, incorporating Google OAuth for user authentication and Firebase for secure data storage.

EDUCATION

Cairo University

June, 2024

B.S., Biomedical Engineering

Cairo, Egypt

SKILLS

Frameworks & Libraries: React.js, Next.js, Vite, Tailwind CSS, Three.js, GSAP, Zustand, TanStack Query, shadcn/ui, react-hook-form, Zod, Redux

Languages & Tools: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python, C#

Tools: Git, GitHub, Supabase, Firebase, Jest, Unity, Blender, Resend, npm, i18n, Responsive Design, Figma.
